Professional Summary

Full Stack Java Developer with 3+ years of experience building scalable microservices using Java, Spring Boot, and REST APIs. Skilled in cloud-native development (AWS, Docker), distributed systems, and AI-powered applications using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and vector databases (pgvector). Proven track record of improving system performance, reducing incidents, and delivering high-impact features.

Technical Skills

- Languages:** Java , SQL, GraphQL
Frameworks & Libraries: Spring Boot, Spring Framework, Micronaut, React.js, JPA/Hibernate, JDBC, LangChain4j, JUnit, Mockito, Jest
Databases: PostgreSQL, Snowflake, pgvector, Redis
AI/ML & Tools: Ollama, Vector Embeddings, RAG (Retrieval-Augmented Generation)
DevOps & Cloud: Docker, Jenkins, Git, Maven, AWS, CI/CD, SonarQube
Security & Architecture: Spring Security, JWT, Microservices, RESTful APIs, Kafka, Agile/Scrum

Experience

- Cloudium Software** December 2024 – Present
Software Engineer Kochi, Kerala
- Developed backend features and resolved 15+ production bugs for Equip Healthcare using **Java**, **Micronaut**, and **PostgreSQL**, reducing incidents by 30% and improving system stability by 25%.
 - Building **AI integration** features using **Large Language Model APIs**, implementing intelligent automation workflows to enhance healthcare data processing and clinical decision support systems.
- IBS Software** June 2023 – December 2024
Senior Product Engineer Kochi, Kerala
- Implemented 15+ **full-stack** features for ICargo using **Java**, **Spring Boot**, and **GraphQL**, reducing production incidents by 20% and improving performance by 18% for 10,000+ users.
 - Maintained **Continuous Integration / Continuous Deployment pipelines** in **Jenkins**, integrated **SonarQube** for code quality analysis, and accelerated deployment by 20% with 90%+ test coverage using **JUnit** and **Mockito**.
- Cognizant Technology Solutions** March 2023 – June 2023
AI and Analytics Intern Kolkata, West Bengal
- Optimized **Snowflake** database schemas on **AWS**, improving query performance by 20% and reducing costs by 15%. Built 10+ data visualization dashboards enabling data-driven decisions across 3 business units.

Projects

- dbSight - AI-Powered NL to SQL Platform** | *Spring Boot 4.0, LangChain4j, Docker, PostgreSQL, Redis* [link](#)
- Built an AI-powered Natural Language to SQL platform using **Spring Boot 4.0** and **LangChain4j** with **RAG-based semantic search**, enabling conversational queries across PostgreSQL, MySQL, and MariaDB with 65% relevance threshold.
 - Architected **microservices** application with **Docker**, **Redis caching**, **pgvector** embeddings, **Ollama** LLM inference, multi-tenant connections, **Authentication & Authorization**. Integrated AI fallback models (Gemini, OpenAI) with rate limiting and query caching.
- DineOut** | *React, Spring Boot, MySQL, Hibernate* [link](#)
- Developed full-stack restaurant management system with **RESTful APIs**, **Spring Boot**, and **Hibernate ORM**, reducing order processing time by 30%, bugs by 30%, and improving response time by 40%.

Education

- Narula Institute of Technology** 2019-2023
Bachelor of Technology in Electronics and Communication Engineering(GPA: 8.81 / 10.00) Kolkata, West Bengal

Achievements

- Debutant Award:** Recognized as top 10 performer out of 800+ employees at IBS Software for outstanding contributions.
