PROFESSIONAL SUMMARY

Full Stack Java Developer with 3+ years of experience building scalable microservices using React.js, Java, Spring Boot, and REST APIs. Skilled in cloud-native development (AWS, Docker), distributed systems, and AI-powered applications using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and vector databases (pgvector). Reduced system issues and improved performance while delivering core features.

TECHNICAL SKILLS

- Languages & Frameworks:** Java, SQL, GraphQL, Spring Boot, Micronaut, React.js, JPA/Hibernate, LangChain4j, JUnit, Mockito
- Databases & AI/ML:** PostgreSQL, Snowflake, pgvector, Redis, LLMs, RAG, Vector Embeddings, Ollama
- DevOps & Cloud:** Docker, Jenkins, Git, Maven, AWS, CI/CD, SonarQube
- Architecture:** Microservices, RESTful APIs, Spring Security, JWT, Kafka, Agile/Scrum

EXPERIENCE

- Cloudium Software**
Software Engineer

December 2024 – Present
Kochi, Kerala

 - Developed backend features and resolved 15+ production bugs for Equip Healthcare using **Java**, **Micronaut**, and **PostgreSQL**, reducing incidents by 30% and improving system stability by 25%.
 - Building **AI integration** features using **LLM APIs**, implementing intelligent automation workflows to enhance healthcare data processing and clinical decision support systems.
- IBS Software**
Senior Product Engineer

June 2023 – December 2024
Kochi, Kerala

 - Implemented 15+ **full-stack** features in ICargo, leading to a 20% reduction in production incidents.
 - Architected and deployed a new Receivables Management Screen from scratch, handling end-to-end architecture, development, and deployment, improving efficiency by 35%.
 - Improved Preview Pane performance by 18% by eliminating over-fetching through optimized data queries.
 - Collaborated with DevOps to maintain CI/CD pipelines in **Jenkins**, and integrated **SonarQube** for continuous code quality checks and accelerating feature roll-out by 20%.
 - Engineered clean, testable code with **JUnit** + **Mockito** and optimized microservices to boost reliability and eliminate critical bugs.
- Cognizant Technology Solutions**
AI and Analytics Intern

March 2023 – June 2023
Kolkata, West Bengal

 - Optimized **Snowflake** database schemas on **AWS**, improving query performance by 20% and reducing costs by 15%. Built 10+ data visualization dashboards enabling data-driven decisions across 3 business units.

PROJECTS

- DBSight - AI-Powered NL to SQL Platform** | *Spring Boot 4.0, LangChain4j, Docker, PostgreSQL, Redis* [link](#)

 - Built an AI-powered Natural Language to SQL platform using **Spring Boot**, **LangChain4j** and **RAG-based semantic search**, enabling conversational queries across PostgreSQL, MySQL, and MariaDB with 65% relevance threshold.
- DineOut** | *React, Spring Boot, MySQL, Hibernate* [link](#)

 - Developed full-stack restaurant management system with **RESTful APIs**, **Spring Boot**, and **Hibernate ORM**, reducing order processing time by 30%, bugs by 30%, and improving response time by 40%.

EDUCATION

- Narula Institute of Technology**
Bachelor of Technology in Electronics and Communication Engineering(GPA: 8.81 / 10.00)

2019-2023
Kolkata, West Bengal

ACHIEVEMENTS

- Debutant Award:** Top 5 performer among 800+ employees at IBS Software.
